RECENT PROJECTS

FloPool Custom React Website - flopool.com - [View Google Lighthouse scores](#)

A custom website design using React, Gatsbyjs, and Contentful API, with performance in mind scoring over 90 on Google Lighthouse while being ADA compliant.

Technologies: React, Gatsbyjs, React Router, Contentful, Bootstrap, FontAwesome, Google Analytics, ADA Compliant, Photoshop, Netlify, Netlify Forms, GitHub, git, npm, responsive design

React YuGiOh! Card Database - aaronmolina.me/yugiohdb-react-firebase-app - [View source code on GitHub](#)

A React app utilizing Algolia to search over 11K saved YuGiOh! Cards. I'm using Google Firebase's Cloud Firestore database to store card details, Cloud Functions to download missing card images then storing them in my Google's Cloud Storage bucket to serve them back to the client. I use browser storage to save recently searched cards.

Technologies: React, React Bootstrap, React Bootstrap Icons, React Router, Jquery, Algolia Search, Google Firebase, Google Cloud Storage, responsive design, browser local storage, git, GitHub

React Spotify Shortcuts - spotifyshortcuts.netlify.app - [View source code on GitHub](#)

React app to help me manage my Spotify music library. It uses Spotify Web API for OAuth2.0 authentication, gets all user tracks and renders them using React Table, gets user details, deletes duplicate tracks, and more.

Technologies: React, React Bootstrap, React Bootstrap Icons, React Router, React Table, NPM, git, GitHub, responsive design, Netlify

FlyingAcademy Custom WordPress Website - <https://flyingacademy.com>

Worked together with a designer to create a custom WordPress website for a flight school in Miami, FL.

HTML5, CSS3, JavaScript, jQuery, Foundation 6 CSS, Vertical Rhythm theory, WordPress, Google Maps API, Advanced Custom Fields WP plugin
